

**DR-6 Hybrid** - The new DR-6 Hybrid coverstock offers Track's strongest down lane motion in the mid performance category. Its angular characteristics are perfect for any medium oil condition or broken down lane pattern.

**Modified Kinetic**— The Modified Kinetic core is back by popular demand. This low RG, medium differential and low MB core stores energy longer and uses it quicker than Track's other mid performance cores. You won't find an asymmetric core for this price anywhere!

**Track Kinetic Emerald** - The extremely popular Kinetic series is back. With the modified Kinetic core wrapped in the all new DR-6 Hybrid cover, this new Kinetic is at an all new price point, making it the most engine for your money.

**BALL NAME** Kinetic Emerald
