

Available Weights: 12-16 lb

Bottom line, in the HP3 line we have been looking for the next generation of Haywire. Needless to say, the new IDOL is that and then some. You will see a similar motion in the midlane compared to the Haywire, but with the new core and new cover you will see more overall hook.

## STAR STRUCK

- Ikon™ Core: Pushing symmetrical dynamics to a new level for huge backend motion
- MicroTrax-SX18™ Coverstock: The grittiest, grippiest, most aggressive nano cover we've ever created
- Factory Finish: 2000-grit pad for medium-high flare potential and strong traction
- Lane Conditions: Draws all the attention in medium to heavy oil conditions
