## Toehold • Hyperflex • Engineering

This revolutionary new design delivers unprecedented durability and flexibility by reinforcing the most common high-stress areas of the shoe to help prevent wear and cracking.

Our patent-pending **TOE HOLD OUTSOLE SYSTEM** features an abrasion-resistant compound designed to resist toe drag breakdown, and two state-of-the-art **HYPERFLEX CHANNELS** that allow the sole to flex and stretch freely, for exceptional comfort and unparalleled flexibility that extends the life of the shoe.

## T·H·E 9 REPLACEMENT SLIDE & TRACTION SOLES

## INTERLOCKING TOE HOLD SYSTEM

Toe Hold Clip on the interchangeable sole **secures to shoe by locking onto recessed track.**

Highly abrasion-resistant toe material on the interchangeable sole **prevents peel-back** and helps to prolong wear.

**2 HYPERFLEX HINGES**  
Dual hinges help to ensure proper alignment during sole attachment.

**3 HYPERFLEX CHANNELS**  
Dual channels allow the sole to flex and stretch at both points, minimizing cracking and increasing flexibility and comfort.

**4 SYMMETRICAL OUTSOLE SYSTEM**  
Patented interchangeable design fits soles on left and right shoes with no trimming.

**5 RAISED HEEL DESIGN**  
Lifts middle of sole off of the floor to reduce sagging.

**6 UNIVERSAL HEEL SYSTEM**  
Designed to fit existing interchangeable Dexter replacement heels.

**7 OUR SOFTEST LEATHER**  
Glove-soft upper provides extraordinary comfort and greater flexibility.

**8 SECURE FIT LAST**  
Streamlined with a shorter toe for a closer fit and more control.

**9 NOTCHED THUMB GRIP**  
For easy removal of interchangeable soles and heels.

## SOLES & HEELS TIPS

### Shoe Care Recommendations

- Inspect soles and heels for dirt or contamination.
- Always use shoe protectors when off the approach.
- Soles and heels should be replaced as soon as possible if there is any indication that they are not securely attaching onto the shoes.
- Inspect soles and heels for excessive wear and replace when necessary.
- Shoes should be stored in a cool, dry, and well ventilated area as trapped moisture and extreme heat or cold can cause damage.

### Use a Lower Heel Number Than Sole Number

Because you brake with your heel, use a heel with more friction (a lower number) than the sole. An exception would be if you bowl best with a heel that has the same number as the sole. Using a higher heel number than sole number is possible but not recommended for general approach conditions.

### Custom Traction Heel Height

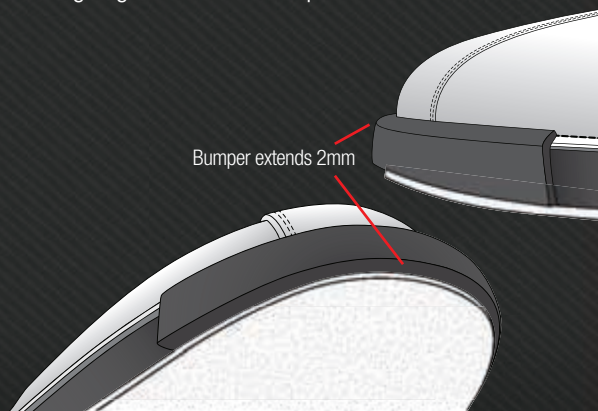

Exclusively with the Dexter SST 8's you can customize your traction shoe heel height by interchanging heels to correspond exactly to the height of your slide foot.

### Break In Your Soles & Heels

When changing either the soles or heels of your SST shoes Dexter recommends that you use caution when trying the new combination for the first time. Taking several practice slides on the approach without holding a ball will allow the bowler to predict how the reconfigured shoes will slide on the current approach conditions before throwing the next ball.

### Avoid Replacement Sole Peel-Back

When attaching a sole to the SST's make sure that the sole's leading edge is first aligned with the front of the Velcro® area ONLY. Note that on the SST8 the leather toe bumper will extend another 2mm in front of the sole bottom thereby protecting the leading edge of the sole from peel-back.
