2015 PRODUCT CATALOG

As Turbo enters its 26th season, it's hard to believe how far we have come, of course, with you and legions of other bowlers, retailers, distributors and industry partners to thank.

As the original 2-N-1™ Grip, Turbo leads the way in innovative accessory products and works to provide opportunity for bowlers and retailers across the globe through educational support and event sponsorship. **Nothing is more important to us than giving back to the community that has supported us for so many years.**

Turbo is proud to partner with many leading industry organizations such as the USBC, PBA, IBPSIA, International Bowling Museum and Hall of Fame and countless event promoters and industry manufacturers promoting long-term opportunities that advance competitive and casual sport participation.

The continued focus on youth education has never been more important than it is today. Promoting youth education through our Turbo Tech Collegiate Expo has been a rewarding experience and not just for the high school students, parents and coaches that attend but to our team as well. We know that building new generations of competitive bowlers can only improve the quality and viability of our sport. We hope you will support our efforts through the use of our products and by sharing information on the Collegiate Expo and other Turbo sponsored clinics.

We have a great line-up of products again this season along with some exciting new additions! Take a look inside. More information can also be found on our **newly designed web site at www.turbogrips.com**. Again, we thank you for choosing Turbo brand inserts and wish you every success this season.

Sincerely,

A handwritten signature in white ink that reads "Lori". The signature is fluid and cursive, with the first letter being a large, stylized "L".

Item #225.31

The Jack

Aids in lifting an Inner Sleeve insert up and out of a tight thumb hole. Removable inserts can become difficult to remove when a ball core expands due to hot/cold climate changes or simply over time as the ball absorbs lane oil. Ball core expansion puts pressure on the Switch Grip Outer Sleeve which causes difficulty in removing or turning the Inner Sleeve. The Jack aids in removing Inner Sleeves that tighten up in ball.

SKIN PROTECTION TAPE

Skin Protection & Fitting Tapes

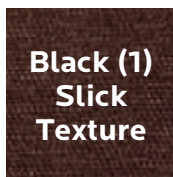

Unlike traditional bowling tapes, Skin Protection and Fitting (SPF) Tapes are worn on the fingers or thumb and can be applied in a variety of ways to modify release, ease grip tension and adjust hole size without major changes to ball drilling. SPF Tapes will also reduce or eliminate discomfort caused by calluses, blisters and cuts from dry skin.

Check out popular tape applications on-line.
