NOT REQUIRED WITH MONROE # 16904 SHOCK
Features:
- Eliminates ball scars and damages resulting from ball on metal contact
- Made of urethane polymer, smooth and strong material
- Designed with thicker cross sections and flanges for extra strength and stiffness
- Flange protects ball from kickback edges
- Inserts cast into part to make installation easier
- Re-enforced ribbing support guard
- Clearance for lift arm

Features:
- Oil resistant, higher friction surface that resists twisting
- Superior tensile cord strength on the flat side of the belt
- V-guide is merely a guide
- V-guide does not separate
- Thicker belt (flat part) lengthens life

Note: Spring is top on Monroe Shock, Bottom on Gabriel Shock. Gabriel Shock is no longer available.
